

SARTHAK S. GITE

FULL STACK DEVELOPER & AI ENTHUSIAST

Balewadi, Pune (411045) | **Email:** sarthakgite006@gmail.com | **LinkedIn:** linkedin.com/in/sarthakgite06 | **GitHub:** github.com/Sarthakgite06

SUMMARY

Passionate AI & Data Science student with hands-on experience in web development, data-driven solutions, and real-world projects like customer churn prediction and chatbot development. Known for blending problem-solving skills with creativity, I thrive on building efficient, user-focused solutions while continuously learning and adapting to new technologies.

PROFESSIONAL EXPERIENCE

NeuAi Labs, Intern

Dec 2024 - Jan 2025

- Developed a Customer Churn Prediction System using Python, machine learning models, and data preprocessing techniques to improve retention insights.
- Performed data analysis and visualization with SQL/MongoDB and libraries like Pandas and Matplotlib for actionable business insights.
- Optimized model performance through feature engineering and hyperparameter tuning, achieving improved prediction accuracy.

Codec Technologies, Project Head Intern

Mar 2025 - Apr 2025

- Led and managed the end-to-end execution of assigned technology projects, ensuring timely delivery, effective team collaboration, and alignment with organizational goals.
- Overseeing project planning, resource allocation, progress tracking, and stakeholder communication.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, SQL

Web Development: HTML5, CSS3, React.js, Node.js, Express.js, Spring Boot

Databases: MySQL, MongoDB

Tools & Platforms: Git, GitHub, Postman, Netlify, Docker

Others: Data Structures & Algorithms, RESTful APIs, Machine Learning, Data Analysis

EDUCATION

B.E. in Artificial Intelligence & Data Science

Nov 2022 - Present

Savitribai Phule Pune University (SPPU) || **CGPA - 8.88 / 9.60**

- Focus on core AI, machine learning, and data analysis techniques. Gained hands-on experience through academic projects, internships, and coding competitions.

Higher Secondary (Class XII)

Mar 2021 - Jun 2022

Annasaheb Waghire College, Otur || **Percentage: 64.83%**

PROJECTS

IoT Based Virtual Doctor

An intelligent remote healthcare solution designed to monitor vital health parameters in real time using IoT sensors and provide immediate feedback/alerts. Reduces physical doctor visits, facilitating chronic disease monitoring.

Weather Dashboard & Student Management System

Developed full-stack interfaces with CRUD operations. Implemented RESTful API backend using Spring Boot, Hibernate, and MySQL/H2 for secure data storage and retrieval.

Uber Ride Analysis (Data Analysis Project)

- Analyzed Uber ride dataset to identify trends in ride frequency, customer behavior, and demand patterns.
- Conducted data cleaning, processing, and exploratory data analysis (EDA) using Pandas and NumPy.
- Visualized peak hours and location demand using Matplotlib, Seaborn heatmaps, and charts.
